

# ECO CorFlex

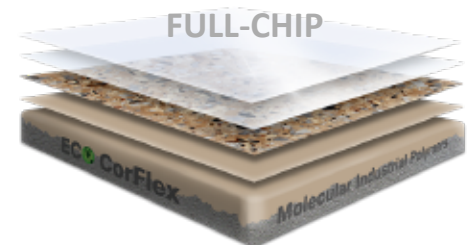

## Molecular Industrial Polymers

### ***WHY CHOOSE US?***

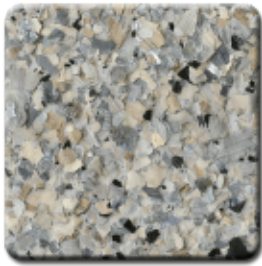

- We're your **local expert installers** of **industrial-grade**, epoxy-polyurea-polyaspartic concrete floor coatings
- Our proprietary coatings are **backed by over 25 years of research & development** (circa 1996) and coating system installation experience
- Together with our **network of over 30 certified dealers**, we've installed over 70 million sq ft of coating systems
- *Unlike our competition, we warranty ALL moisture-related issues 100%...the #1 reason for coating system failures*
- We **only use 100% solids polyaspartic-polyurea, industrial-grade proprietary liquid coatings** (compared to 70-75% solids used by our competition)
- We are the **only company offering one-of-a-kind, full-chip mica stone coating systems**. This flooring is not only stunning, it's the strongest floor coating system on the market today...*thin "1-day" systems don't compare*
- We always **test concrete moisture with a Tramex concrete moisture meter** before selecting our primer coat, ensuring permanent concrete adhesion
- We **never install polyurea-polyaspartic coatings direct-to-concrete**...our competitors do, with their "1-day polyurea-polyaspartic" systems. **Our 2-day coating systems are industrial-grade, incorporating a moisture-tolerant or moisture-mitigating primer**
- Licensed, bonded, insured and registered
